

## Aeration

ProSpare supply a comprehensive range of aeration equipment site proven to solve flow problems associated with handling bulk powders and granular materials.

With such a diverse range of alternative aeration techniques at our disposal we are able to solve bridging, ratholing and compacting problems when handling virtually any dry bulk material. To take advantage of our free design service please send details of your application and we will forward our recommendations by return.

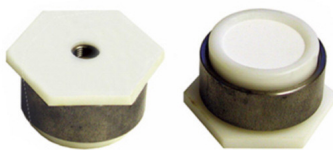

### Solimar Aeration Fluidiser

- Extremely effective in difficult applications
- Combination of directional air flow and vibration
- Unique silicone disc with patented lip seal
- Long life, virtually maintenance free
- External mounting assembly available

### Monitor & CAMS Aeration Pads

- Effective, uniform air distribution
- Monitor heavy duty construction with integral stiffeners
- Cotton diffuser with protective mesh gauze
- CAMS low cost pads
- Robust housing to help sustain aeration performance

### CAMS Aerator

- Simple, reliable operation
- Low cost solution to powder flow problems
- Easy installation from outside the silo
- Supply includes weldable socket
- Compact 55mm diameter

### Monitor Evasser Flo Pad

- Highly effective dual direction air sweep
- Ideal for large silos
- 8 way multiple distribution Flo Pad available
- Simple installation with external mounting plate
- Flexible operation with variable air pressure
