## ConicalAir MixerVent

# ProSpare

ConicalAir CDX mixer venting filters are specifically designed to solve the long standing problem of dust emissions from mixers and blenders during the batching cycle. CDX filters effectively control airborne dust and return filtered product directly back to the mixer creating a clean, healthy working environment and less waste. The CDX range is designed around innovative conical cartridges which enable the filter to offer superior efficiencies and performance combined with lower operating costs, simpler maintenance and better reliability.

**Effective dust control**

**Unique conical cartridge**

**Minimal running costs**

**Quiet operation**

**Compact design**

**Improve health and safety**

**COSHH compliance**

CDX filters are available in a range of sizes to suit mixers of batch capacities from 250 litres to 4500 litres. Filter sizing is crucially affected by plant design and the batching process. Experienced ProSpare engineers will be pleased to help determine optimum sizing for your application. Contact our capital sales department or see our website for further details.

Particularly compact design with minimum footprint for installation in tight spaces.

Quick, safe cartridge access. Preseparation chamber reduces dust load.

Unique hollow cone directional reverse jet cleaning system extends cartridge life.
